Gigamon Expands International Reach into Russia***Data Access Networking Innovator Gains New Customers in 41st Country Served***

Silicon Valley — December 28, 2009 — Gigamon[™], the leading global provider of intelligent data access networking[™], today announced its award-winning GigaVUE[™] platform is available and in deployment within Russian organizations. The first of its category to enter the Russian market, Gigamon's expansion solidifies its global advantage.

By partnering with the leading Russian value-added resellers (VARs) and adding to its team Country Manager Julian Demurjian, Gigamon is bringing a revolutionary new concept to Russian data centers seeking the most innovative, affordable network monitoring platform. Gigamon provides centralized data access creating a one of a kind monitoring and analyzing solution that can give visibility to any data in the network. Chief Information Officers (CIOs) and network engineers choose Gigamon for its instant return on investment and enhancement of existing monitoring tools; from security to performance monitoring. In addition, Gigamon ensures the network is optimized for regulatory compliance now and in the future.

"With our first deal closed with a major telecommunications company and several evaluations scheduled in the near future, there is a bright future for Gigamon in the Russian Federation," said Demurjian, Gigamon's Russia country manager.

Russian data centers have experienced rapid growth over the last eight to ten years. In providing new ways to manage increasingly complex networks, solutions such as Gigamon are in high demand.

"We're encouraged by the great demand for Gigamon technology in Russia, and the excellent results we've had there in such a short amount of time," said Kevin Jablonski, Gigamon's senior director of business development. "Gigamon is well versed in developing relationships internationally, and will continue to grow exponentially because we can provide access and visibility to any data, any time, anywhere in the world."

About Gigamon

Gigamon delivers intelligent data access solutions to enhance monitoring of service provider and enterprise data centers. The company's world-renowned GigaVUE[™] "orange boxes" aggregate, filter and replicate customized data streams to all monitoring tools. Gigamon pioneered technology for multi-tool environments to address new demands for reporting and analyzing organizational data. Now in its third generation with global deployments in more than 40 countries and 90 percent market share for intelligent data access, Gigamon's GigaVUE platform is the only proven, fully-integrated, total solution for all data access needs. Gigamon's patented technology enables companies to realize day one ROI by increasing tool value and operational efficiencies. GigaVUE ensures seamless and controlled delivery of the right data at the right time to the right tools. Organizations deploying Gigamon solutions achieve greater uptime, reduce threat vulnerability and improve regulatory compliance.
