

**For Immediate Release**

## **Gigamon moves into New Corporate Headquarters**

**Silicon Valley—June 21, 2010 - Gigamon™**, the leading global provider of Intelligent Data Access Networking™, today announced that it opened its nearly 50,000 square foot headquarters facility at 598 Gibraltar Way in Milpitas, California.

“This is an important and strategic event for Gigamon. We are confident that the new facility will support the rapid growth of the company” said Ted Ho, CEO. Gigamon has successfully increased its revenue by greater than 55% year over year since 2007 and has been profitable since shipping the first GigaVUE in 2005. The entire GigaVUE product line is assembled, quality tested, packaged and shipped from this facility right here in the USA. Ted said, “We’ve come a long way and I want to express how thankful we are for all of our loyal customers who made this growth possible. This facility will help increase our responsiveness and capability to support and deliver more innovative products to our customers.”

The new facility will also provide the space needed to support the increased hiring the company has been experiencing, adding over twenty key positions since the beginning of the year. Gigamon continues to seek world-class engineering talent for hardware and software development as it upholds its status as the leading innovator in the Data Access Market.

“We are very excited about this move to a much larger facility. Our entire organization feels motivated and re-energized in our new surroundings. As our Data Access Market continues to expand, we needed more space to foster ideas and spontaneity, which has been the hallmark to our success” said Kevin Jablonski, Vice President of Marketing and Business Development. “Customers across the globe continue to choose Gigamon as an integral solution that ensures secure access and complete visibility of all their critical data, 24x7. With our newer and larger facility we are even better positioned to continue to meet the increasing demand for our GigaVUE product line.”

### **About Gigamon**

Gigamon™ delivers intelligent data access solutions to enhance network monitoring of data centers, service provider and enterprises. The company’s world-renowned GigaVUE® aggregates, filters and replicates customized data streams to all monitoring tools. Gigamon pioneered the technology for multi-tool environments, addressing the growing new demands for reporting and analyzing organizational data. Now in its third generation with global deployments in more than 40 countries, Gigamon’s GigaVUE platform is the only proven, fully-integrated, total solution for all data access needs. Gigamon’s patented technology enables companies to realize ROI on day one by increasing tool value and operational efficiencies. GigaVUE ensures seamless and controlled delivery of the right data at the right time to the right tools. Organizations

deploying Gigamon solutions achieve greater uptime, reduce threat vulnerability and improve regulatory compliance. For more information about Gigamon and its award-winning solutions, visit [www.gigamon.com](http://www.gigamon.com).
