## **Gigamon Announces Reseller Agreement with Fishnet**

*Fishnet Security Partners with Gigamon to offer Modern IT Security Infrastructure.*

**Silicon Valley—July 28, 2010 - Gigamon™**, the leading global provider of Intelligent Data Access Networking™, today announced a reseller agreement with Fishnet Security, the #1 provider of information security solutions that combine technology, services, support and training. By partnering with Fishnet, Gigamon can further extend the availability of its patented, world-renowned technology to provide secure access and complete visibility to all of the critical data.

“Gigamon is excited about the potential that Fishnet offers with their vast portfolio of over 4,000 customers and their experienced staff of over 370 employees worldwide,” said Doug Lockhart, Director of National Channels & Distribution for Gigamon. “Gigamon adds to Fishnet’s impressive product offering, the industry’s most advanced data access technology.”

Fishnet has a nationwide team of technology and sales professionals that are very knowledgeable about Gigamon solutions. They can assist clients deploying, configuring and integrating Gigamon technology in their infrastructure. Fishnet’s expertise will allow clients to reap the full benefits of utilizing Gigamon’s solutions. “As Gigamon continues to expand its presence in the security field it is important to build our relationship with Fishnet. Our solution allows security teams to gather data from every critical point and have that data readily available 24x7. That, coupled with the solutions in Fishnet’s portfolio, allows the customer a much higher level of confidence when detecting and eliminating threats.” said Kevin Jablonski, Gigamon’s Vice President of Marketing and Business Development.

“By partnering with Gigamon, we can offer CIOs and their teams the best of breed technology to modernize their network security at the best cost.” said Luis Palacio, Fishnet Director of Vendor Relations. “With Gigamon’s GigaVUE products, IT staffs can optimize and manage their security environment while meeting the mandate to reduce operational expense and increase productivity.”

### **About Gigamon**

Gigamon™ delivers intelligent data access solutions to enhance network monitoring of data centers, service provider and enterprises. The company’s world-renowned GigaVUE® aggregates, filters and replicates customized data streams to all monitoring tools. Gigamon pioneered the technology for multi-tool environments, addressing the growing new demands for reporting and analyzing organizational data. Now in its third generation with global deployments in more than 40 countries, Gigamon’s GigaVUE

platform is the only proven, fully-integrated, total solution for all data access needs. Gigamon's patented technology enables companies to realize ROI on day one by increasing tool value and operational efficiencies. GigaVUE ensures seamless and controlled delivery of the right data at the right time to the right tools. Organizations deploying Gigamon solutions achieve greater uptime, reduce threat vulnerability and improve regulatory compliance. ### **About Fishnet**

FishNet Security is the #1 provider of information security solutions that combine technology, services, support and training. Organizations are opening their computing environments to accelerate business initiatives. Unfortunately, with limited budget and resources to manage risk, uninformed decisions result in data breaches, negative publicity, decreased revenue, and disruption of services. Providing the most comprehensive security offering, FishNet Security enables clients to manage risk, meet compliance requirements, and reduce costs while maximizing security effectiveness and operational efficiency. Unlike Systems Integrators, Technology Resellers, and VARS, FishNet Security is committed to information security excellence and has a track record of delivering quality solutions to over 4,500 clients nationwide.
