7:00AM – 9:30AM PT / 2:00PM – 4:30PM GMT

Welcome & Technology Overview

Key corporate and technology vision overview

Product & Solutions Overview

An in-depth look into the current Gigamon innovation and product roadmap

Gigamon App Intel and GigaSMART® Functions

Learn how to reduce traffic overload to your security and monitoring tools

Gigamon Visibility & Analytics Fabric™

Enable ops teams to do more, faster with the Gigamon Visibility & Analytics Fabric (VAF)

October 14, 2020

7:00AM – 10:00AM PT / 2:00PM – 5:00PM GMT

Gigamon ThreatINSIGHT™ Overview

Accelerate network detection and response with ThreatINSIGHT

Inline SSL Decryption Overview

Uncover blind spots with inline SSL/TLS decryption

October 15, 2020

7:00AM – 10:00AM PT / 2:00PM – 5:00PM GMT

Gain Visibility and Boost Security in Cloud Hosted Operations

Enable visibility across private, public clouds

Service Provider Subscriber Intel

Scale network analytics and security with Gigamon subscriber intel

October 13, 2020

9:30AM – 2:15PM PT / 4:30PM – 9:15PM GMT

With more traffic and the majority of it encrypted with higher interfaces, how can your tools and ops teams keep up?

The Gigamon Visibility and Analytics Fabric dramatically improves tool efficiencies and enables NetOps, InfoSec and CloudOps teams to do more, faster.

Gigamon has also partnered with leading vendors like LiveAction, Riverbed and Ordr to optimize network visibility.

Deep Dive Sessions

- + Application Intelligence Technical Immersion Workshop
- + Gigamon Active Visibility
- + Ordr & Gigamon for Network and Device Visibility
- + Riverbed & Gigamon for Complete Visibility with Advanced Network Performance Monitoring
- + Introduction to Ansible Automation in Gigamon
- + Next-Gen Network Performance Monitoring with LiveAction and Gigamon
- + Empower Your Gigamon Visibility and Analytics Fabric with Intent-Based Orchestration

October 13, 2020

2:30PM – 3:30PM PT / 9:30PM – 10:30PM GMT

Customer Presentation: Shell Oil

9:30AM – 1:30PM PT / 4:30PM – 8:30PM GMT

Over 80% of network traffic is encrypted and near 60% of malware targets encrypted traffic. And as a result of the surge of both change and disruption in the workplace, cybercrimes have seen a 300% increase.

The combination of Gigamon inline SSL/TLS decryption and Gigamon ThreatINSIGHT, a cloud-native NDR solution, organizations are better enabled to protect their network. Gigamon also integrates with leading vendors like Zscaler and Cisco SecureX to optimize network security.

Deep Dive Sessions

- + Ransomware Loitering Presents an Opportunity for Network Detection
- + TLS Decryption Architectures + HSM and Certificate Management Integrations
- + Gigamon ThreatINSIGHT & Cisco SecureX are Better Together
- + TLS 1.3 Deep Dive
- + Zscaler Delivers Uniform Security Users Working from Anywhere
- + Getting the Most Out of Your SIEM
- + A Look Into a Cyber Threat Investigation with ThreatINSIGHT
- + Exploring Cybersecurity in Industrial Control Systems with Gigamon

October 14, 2020

Organizations are consuming apps from so many cloud deployments, including public cloud, therefore increasing the visibility challenge to both secure and optimize. Learn how Gigamon V Series enables organizations to have visibility into private clouds like VMware, Nutanix and OpenStack as well as public clouds like AWS and Azure.

Deep Dive Sessions

- + Bringing Visibility to VMware Private Cloud
- + Bringing Visibility to AWS and Azure Public Cloud with Gigamon Cloud Suite™
- + Take Control with Application Visibility in Nutanix-based Hyperconverged Infrastructures

October 15, 2020

The massive growth in voice, video and data traffic, along with the transition to 5G and CUPS, exacerbates and further complicates both monitoring and network management. Gigamon Subscriber Intelligence enables service providers to scale network analytics and security, allowing existing tools to deliver the desired performance and security.

Deep Dive Sessions

- + 5G Challenges and Strategies to Overcome Them
- + Packet Reduction Techniques for SPs
- + Advanced CUPS Automation with Ansible
- + Nokia Predictive Video Analytics
