Gigamon Education Services
Become the Expert You Want to Be

The Gigamon® Education Services Program delivers innovative training, development and certification opportunities supporting Gigamon solutions. This learning experience helps boost the productivity and potential of novices, professionals and experts alike. This program educates, enriches and empowers. It offers the freedom and flexibility for you to learn how, when and where you want. It will help you gain the knowledge you need to make a difference in your organization.

Who Is It For?

Gigamon Education Services are developed for third-party implementers, professional services companies and customers with security, networking and cloud solutions backgrounds. As a participant, you'll gain networking and security expertise enabling you to:

- Design network architectures to include the GigaSECURE® Security Delivery Platform

- Implement the GigaSECURE Security Delivery Platform to provide network visibility across physical, virtual and cloud environments to help strengthen your organization's security posture

- Implement inline bypass threat prevention and inline SSL decryption solutions

- Reduce tool sprawl and associated costs through implementation of the advanced architecture

- Bridge the gap between SecOps and NetOps through shared tool usage

The more you learn about the GigaSECURE Security Delivery Platform, the greater the value you'll be able to deliver to your security team, networking team and business. Our carefully designed course offerings will get you up to speed with powerful capabilities at your fingertips. That helps you achieve faster deployment, reduced implementation costs and quicker ROI.

Course Offerings

The current, carefully designed course offerings are:

- **Gigamon Foundation Course:** Essential skills for those new to Gigamon solutions. This includes how to initially deploy Gigamon products and create flow maps that ensure the right data gets to the right tool at the right time. This two-day course lays the groundwork for more advanced courses. See the **datasheet** for details.

- **Gigamon Designing and Implementing an Inline Bypass Threat Prevention Solution Course:** Designed for those ready to expand their skills, this two-day course shows how to design and implement the Gigamon inline bypass threat prevention solution using classic inline bypass, flexible inline arrangements and inline SSL. See the **datasheet** for details.

- **Gigamon Certified Professional (GCP) Certification and Boot Camp Course:** A GCP can design and implement the GigaSECURE® Security Delivery Platform to enable an enterprise with pervasive visibility into its network traffic. The five-day boot camp forms a recommended part of the candidate's preparation for the certification exam. See the GCP Certification and GCP Boot Camp **datasheets** for details.

Who Will Benefit From This Training

- All users of Gigamon products and Channel Partners implementing Gigamon solutions

- Security operations professionals and architects

- Network operations professionals and architects

- Professional services and system integration specialists

- Network and security administrators and architects

Gigamon Authorized Training Partners

These courses are delivered by Gigamon Authorized Training Partners who conduct intense, hands-on training in a variety of learning formats and delivery methods.

To find out more details, including schedules and availability, follow the links below:

• **Edify** – Public training programs and onsite training at a customer's location

• **Fast Lane** – Solution-based training and services

Pricing and Ordering

All prices are in U.S. dollars and subject to change.

Instructor Led Training (ILT)   Instructor Led Online training (ILO)   Recorded Proctored Exam (RPE)
