

## How Does Gigamon ThreatINSIGHT Beat the Competition?

# Three Words: Guided-SaaS NDR

Gigamon ThreatINSIGHT™ is by your side offering the only network detection and response (NDR) solution that combines unrivaled threat detection and response capabilities with expert guidance for SOC and incident response (IR) teams in one all-inclusive solution.

You stay free of the distractions created by traditional security tools so you can focus on most important incidents:

- + Remove burdensome tasks, like maintenance and detection tuning
- + Get expert threat and incident guidance by our team of seasoned security analysts and incident responders
- + Receive ongoing training for your security team
