

EXECUTIVE SUMMARY

Gigamon Dominates the Network Monitoring Equipment Market for the Sixth Consecutive Year

“Gigamon continues to be the leader in the network monitoring equipment market and they are positioned to take advantage of key industry trends that will drive market growth.”

- Matthias Machowinski, senior research director of enterprise networks and video at IHS Markit

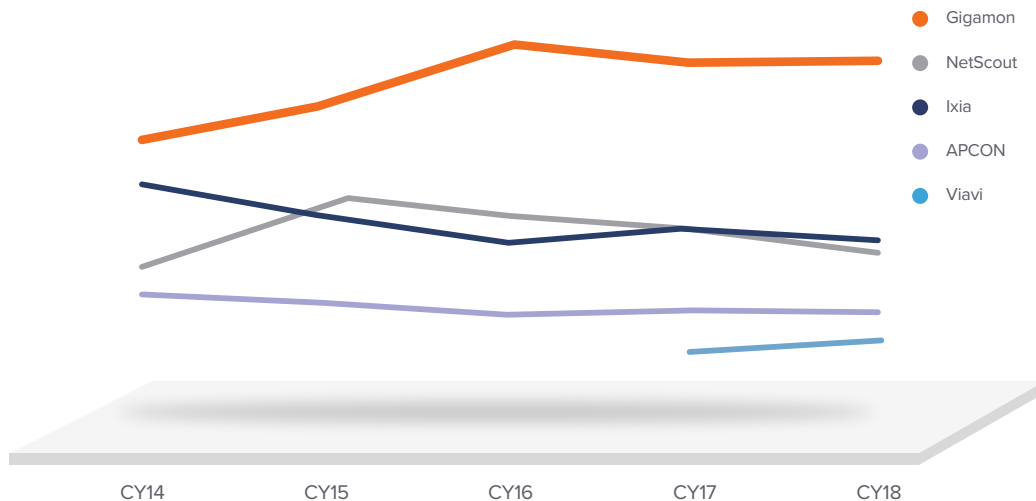

Gigamon leads the Enterprise, Government and Service Provider Markets

With 36 percent of last year’s overall industry revenue, Gigamon remains by far the largest network monitoring equipment vendor with market share exceeding that of the #2 and #3 players combined. Gigamon also leads across each of the key market verticals tracked by IHS Markit: Enterprise (38%), Government (56%) and Service Provider (25%).

Security and reliability of today’s hybrid infrastructure drive market growth

According to the 2019 IHS Markit Network Monitoring Equipment report, there are a few key drivers fueling growth in the network visibility market: 1) security, 2) performance and reliability of networks, 3) increasing network speeds, and 4) blind spots in network monitoring fabrics created with the adoption of modern IT architectures. All these trends require organizations consider visibility as an essential architectural layer of their stack in order to maximize security and the user experience.
