

Healthcare Organizations Need Better Cloud Security Tools

50%

of healthcare organizations do not believe the security tools natively offered by their cloud infrastructure service providers are sufficient.

Healthcare organizations need to ensure security and monitoring across their entire multi-cloud environment, and many do not believe native cloud service provider tools are enough. GigaSECURE® Cloud from Gigamon provides centralized orchestration and single-pane-of-glass visualization across on-premises and public cloud environments. Go beyond CSP-native tools with the capability and efficiency of your existing security monitoring solutions, extended across the multi-cloud landscape.
