

Gigamon Executive Briefing Program

Meet with our team to accelerate both new ideas and solutions that can address your business priorities now and in the future.

The Gigamon Executive Briefing Program provides executive-level engagement with the Gigamon leadership, including engineering, sales, and business functions. This program enables collaboration on digital transformation and optimization, showcasing Gigamon technology, thought leadership, and real-life use cases through immersive demos and presentations.

Visitors from around the world, whether attending in-person, hybrid, or virtual meetings, can discuss current and future business needs with Gigamon experts, focusing on the ongoing importance of network visibility. Agendas are customized to your goals, offering opportunities to connect with our executives, solution experts, product managers, and engineers.

Learn how deep observability from Gigamon efficiently delivers network-derived intelligence and insights to your cloud, security, and observability tools. This eliminates security blind spots, optimizes network traffic and reduces tool costs, enabling you to better secure and manage your hybrid cloud infrastructure.

What You Get

- Shared knowledge from experts working with thousands of complex global organizations
- A customized agenda focused on your unique challenges and business requirements
- Live demos of Gigamon solutions in action
- Access to Gigamon executives, product managers, and engineers

Executive and Thought Leadership Topics

Hear from Gigamon executives and subject matter experts on current business and technology trends:

- Securing the Hybrid Cloud Infrastructure
- Going beyond MELT with Deep Observability
- NetOps journey to the cloud
- Product roadmap — what lies ahead?

Technical Briefings

Deep dive into relevant Gigamon technology and capabilities with the team that engineers and builds our products. See product futures and demonstrations of how customers leverage Gigamon technology capabilities for:

- Advancing your cloud migration journey while maintaining security, monitoring, and cost savings
- Addressing security, troubleshooting, and compliance challenges with application intelligence
- Accelerate data center modernization with GigaVUE hardware appliances

What to Expect

- A personalized agenda aligned with your specific goals and objectives
- Flexible scheduling for EMEA or APAC time zones
- Interactive, customized presentations from Gigamon executives and subject matter experts
- Opportunities for collaborative discussions and knowledge sharing

Getting Started

Gather your cross-functional teams together to get the most value for your organization

Schedule your Executive Briefing today. Contact your sales representative to schedule an in-person, hybrid or virtual Executive Briefing or send an email request to: executivebriefings@gigamon.com.

About Gigamon

Gigamon offers a deep observability pipeline that efficiently delivers network-derived intelligence to your cloud, security, and observability tools, helping organizations eliminate security blind spots, reduce tool costs, and better secure and manage your hybrid cloud infrastructure. Gigamon goes beyond security and observability log-based approaches by extracting real-time network intelligence derived from packets, flows, and application metadata to deliver defense-in-depth and complete performance management. Gigamon has served more than 4,000 customers worldwide, including over 80 percent of Fortune 100 enterprises, 9 of the 10 largest mobile network providers, and hundreds of governments and educational organizations.
